

ORGANIC

DESIGNED by NATURE and *KNAUF*

ORGANIC

Organic Creative Impression ■ Inspirational Project

ACOUSTIC HAPPINESS

Whether you are designing the headquarters of a multinational or the pop-up restaurant of your neighbor, an Olympic stadium or the local gym, we feel that every space deserves good acoustics.

Good acoustics have a huge effect on our mood. A space with good acoustics is considered pleasant and comfortable. The users experience improved concentration and reduced stress level. They really feel better.

CREATIVE FREEDOM

With our Organic range we offer designers full creative freedom. Feel free to play around with the rectangles and squares of our acoustic panels. Mix and match the various colors and use one of our patterns or even create a new pattern as your own signature.

Use Creative Colors, Patterns and Lines to give the interior a unique touch and character.

ALL PASSION

We share a passion for acoustics and interior design. We are happy to support you to create acoustic solutions that fit with the brand identity or personal flavor of your client. We are convinced that we can always find synergies between a perfect acoustic solution and a surprising interior.

ACOUSTIC HAPPINESS

FOR BUSINESS

You probably know that employees that feel well at work are more productive and show a lower absence rate. But did you also know that well-being at work is highly influenced by the level of acoustics and sound insulation?

So whether it is an office space, the meeting room, call center or the company restaurant, every space deserves good acoustics. We are happy to support you in turning every area into a comfortable place to work and stay.

FOR LEISURE

In many cases a restaurant experience is not only defined by its fine food and wines but also by the way you can interact with your friends and family. Echoing sounds from other tables can ruin a nice evening.

If you are designing the interior of a hotel lobby, casino, restaurant or bar play extra attention to the acoustic requirements and use sound absorbing materials. Our Organic range offers the perfect acoustic solution to any space with full creative freedom for the designer.

Music School Épinal (F) • Cafeteria • Architect: Jean Michel Thommée

FOR EDUCATION

Good acoustics of class rooms facilitate the learning process of students and contribute to the well-being of teachers. Teachers working in a sound wise, healthy environment have less voice issues, reduced stress levels and students show increased short and long-term memory with better test results.

Use acoustic solutions throughout the school building and make sure you use fire safe materials. Questions? Consult our experts to create an acoustic solution for your space.

Crèche in Jarville ■ Play Room ■ Architect: In Situ Architecture

FOR SPORTS

No need to say that good sports areas offer an environment that stimulates the best athletic results. A comfortable sports area is also a nice place to be for the athlete's supporters. If you are designing the interior of a sports area, you want to avoid any noise pollution that distracts the athletes. You don't want nuisance to frustrate their concentration.

Sports spaces are demanding areas as they need to cope with humidity and chloride. And they need to absorb the sounds of applauding audiences and ball bounces. With our Organic range we offer acoustic solutions that can withstand any requirement.

CREATIVE FREEDOM

CREATIVE COLOURS

Each business is unique. Each company has its own brand identity, brand colours and logo. Moreover, colours and designs have a huge effect on our mood. colours can either energise and stimulate creativity or have a relaxing effect on the mood of visitors and inhabitants.

With our Organic range we offer the interior designer the full options to fluently transfer each unique brand identity. Or to realise the atmosphere desired by the client.

CREATIVE IMPRESSIONS

With our single or multi-coloured prints on the panels you bring nature into your space. You can order our 600 x 600 and 1200 x 600 panels with almost any conceivable print. We already have a few standards out of the box, but we sincerely invite you to let your creativity run freely.

Office Entrance • Inspirational Project

CREATIVE LINES

With Organic Creative Lines we offer a complete new dimension to our acoustic panels. We can mill unique cutting lines or patterns in the boards.

With these patterns in walls or ceilings, you can emphasise the continuous and limitless effect of the panel surface or, on the contrary, show a discontinuity when the design changes from one panel to another.

ALL PASSION

If this look book has given you new inspiration and energy to combine good acoustics with inspiring interior designs, then our mission is accomplished. We hope to meet... in a brand new design with your signature one day.

ORGANIC

Organic is a very well performing acoustic slab. Organic can be adapted to all aesthetic and acoustic requirements both inside and out for ceiling and wall finishing.

Organic 35mm
(plenum 200)
 $\alpha_w = 0,60$

ORGANIC TWIN

Organic Twin combines natural aesthetics with even better acoustic performances. Organic Twin is easy to install in almost any ceiling or wall solution.

Organic-twin 50mm
(plenum 200)
 $\alpha_w = 0,95$

ORGANIC MINERAL

Choose Organic Mineral if you need excellent acoustics and also thermal performances. With the combination of wood wool and rock mineral wool Organic Mineral offers both.

Organic-mineral 75mm
(plenum 50)
 $\alpha_w = 1,00$
 $R_D = 1.65 \text{ m}^2 \text{ K/W}$
